

Water-based acrylic drier

RT-3132

Features and advantages:

Environmental protection surface dry accelerator, suitable for alkyd, acrylic, two component polyurethane and other coating systems, shorten the coating surface dry time, improve spraying speed, reduce dust pollution, finger marks, reduce flow hang, shorten the recoating time to assist the positioning and arrangement of pigments, after the addition does not affect the recoating and storage stability.

Product specifications:

appearance	Colorless transparent liquid
type	Non-tin accelerators
Valid copy of	100%

Application: Waterborne/solvent based coatings acrylic coatings

Recommended dosage: Total formula: 0.1-1.0% (please test the most appropriate dosage before use)

Usage: after adding or mixing with resin.

Packing: 25kg non-recycled blue drum. The product is not completely used, the lid must be tightly closed after use.

Storage: keep away from heat source, light source and keep away from light.
