

Hydrophobic anti-fouling agent

RT-3135

Features and advantages:

This product has a reactive active group, can form a chemical bond with the resin, so that the film surface to obtain hydrophobic, oleophobic, reduce dust, improve the permanent effect of coating washing. This product is also used to improve the anti-graffiti, anti-paste performance improvement, is a silicone surface auxiliaries specially developed for easy cleaning paint system

- 1、excellent anti-graffiti, anti-sticking to help stripping, water Angle up to 110 degrees.
- 2、suitable for acrylic coating system, UV light curing coating system.
- 3、Compared with RT-3133, it is better than RT-3133 in terms of leveling and compatibility, but it is slightly insufficient in terms of anti-graffiti and anti-sticking and peeling.

Product specification:

appearance	Light yellow transparent to translucent liquid
Active ingredient	100%
Viscosity (25°C·mPa.s)	1000-4000.

ingredient	Modified acrylic acid polydimethicone
------------	--

Application: UV system, other acrylic systems

Recommended dosage: 0.8-3% of the total formula

Usage: It can be added at any stage in the production process

Packing: Net weight 25Kg/ barrel, 200kg/ barrel.
