## Defoaming agent

### RP-6068

#### Features and advantages:

- 1, has a good ability to inhibit and defoamer.
- 2, because of hydrophobic particles, there may be precipitation in the storage process, as long as it is stirred evenly before use, not affect product quality.
3. If diluted with solvent, please note that the storage life of diluted solution is limited to 1-2 days.
- 4, do not apply varnish.

#### Product specifications:

appearance	Translucent milky white viscous liquid
Solid content	≥95%(140°C 2h)
composition	A polysiloxane compound containing hydrophobic particles
The density of	200-2500mpa ·s (rotary viscometer
viscosity	≥V (bubble viscosimeter method) (25±0.2) °C
Flash point	>100°C

---

**Application:** solvent-based, uv curing system

**Recommended dosage:** addition (total formula) 0.2-1.0%

**Usage:** in order to improve the foam inhibition, defoaming and defoaming speed of the system, it should be added to the abrasive

**Packing:** 25KG / 180KG

**Storage:** Store in unopened original package for 24 months. The products beyond the storage period may be replaced after passing the inspection Continue to use. Containers are not completely used and must be closed immediately after use.
