

Emulsion

R1606

Features and advantages:

1. R1606 emulsion is a non-ionic oil-in-water emulsion of polyolefin. Mainly used in ink painting, coating, polishing oil and other industries, good wear resistance, high slip.
2. The addition of R1606 to the system can improve the scratch resistance and scratch resistance of the film.

Physicochemical property:

appearance	Milky liquid
Solid inclusion	40%
pH value	5-9
Specific gravity, 25°C	About 1.0
Emulsion type	nonionic
diluent	water

Product Application:

The recommended dosage is 3-5% of the formula

Note: The above process is for reference only, the specific formula and process please be handled according to the sample results

Storage and storage period

Stored in an original unopened container at 5 ° C to 30 ° C, R1606 has a standard expiry date of 6 months from the production date. Please refer to the storage advice and expiration date on the package
