

## Silicone wetting agent

### RK-8420

#### Product features and advantages:

RK-8420 for spraying construction of water-based industrial coating substrate wetting, has a strong anti-crater effect, good compatibility, spraying ultrafine atomization effect is good, in the recoating also has a good use effect.

#### Product specification:

Appearance	Transparent liquid
Active ingredient	100%
Chemical composition	Polyether siloxane copolymer

#### Application:

Furniture paint, wood paint, traffic paint, plastic paint

#### Scope of application:

Very suitable for waterborne paint, oil-based paint, coloring paint, transparent paint. It has the function of substrate wetting, reducing static surface tension and anti-shrinkage porosity.
