## Polyacrylate leveling agent

### RF-7101

#### Features and advantages:

1. Excellent varnish compatibility.
2. Excellent long wave leveling to prevent the phenomenon of orange peel.
3. Excellent dynamic surface tension, providing fast spraying leveling speed.
4. Add shine and shine.

#### Product specification:

appearance	Yellowish clear viscous liquid
Chemical composition	Polyacrylate ammonium salt
Active substance content	50%
Flash point	>70°C
viscosity (rotating viscometer method)	1000-5000 mPa·s (25±0.2)°C
density	1.01-1.05 g/ml (25±1)°C
solvent	Dipropylene glycol methyl ether
composition	Ionic acrylate polymer solution

**Application field:** water soluble system

**Usage:** Dilute it with a suitable solvent before adding it to the coating system. It can be added at any stage of the production process, including post-addition.

**Recommended dosage:** Dosage (total formula) 0.1-1.0%

**Packing:** 25KG / 180KG

**Storage:** Keep in unopened original package for 24 months. Products beyond the storage period can continue to be used after passing inspection. The container is not fully used and should be closed immediately after use.
