

Polyamide wax anti-sink slurry

6500

Features and advantages:

Good dispersity and anti - sinking, suitable for furniture paint, automotive paint, industrial paint, with silver powder orientation effect

Product specifications:

appearance	Light yellow color paste
Valid copy of	20%
solvent	PM/水
composition	Polyamide wax

Application areas:

Polyurethane coating, light curing coating, coil coating, furniture paint, industrial paint

Recommended dosage:

1 -- 5% of total formula (please test the most appropriate amount before use)

Usage:

1. In the absence of cosolvent or polymer added directly into the system, the presence of amines helps to disperse.
- 2, water: 6500= 4:1 made to pre-coagulate at any stage

Packaging: 18KG non-recycled plastic drum. The product is not completely used, the lid must be tightly closed after use.

Storage: keep away from heat and fire and keep away from light.
