

Silicone leveling agent

RF-7465

Features and advantages:

1. Can be used in water-based, and solvent based formulations
2. Significantly improves fluidity and transparency in varnishes
3. Anti-shrinkage cavity, smooth, anti-adhesion/peeling effect
4. Provide feel

Product specifications:

appearance	Transparent liquid
composition	Organosiloxane copolymer
Valid copy of	100%

Application: water based, solvent based system, used in wood coatings, industrial coatings, automotive coatings, etc.

Recommended dosage:

1. Recommended amount of automotive paint: 0.05-0.3% for the total formula in the form of supply
2. Radiation curing varnish recommended dosage: in the form of supply for the total formula: 0.05-0.5%
3. Recommended amount of waterborne mask gloss: 0.05-0.3% for the total formula in the form of supply
4. Recommended amount of waterborne and solvent-based wood coatings: 0.05-0.3% for the total formula in the form of supply

Usage:

1. Pre-dilution or supply form can be directly added to the coating.
2. Pre-diluting with the recommended solvent will facilitate addition and mixing.
3. In alkaline or acidic media, it is recommended to check the long-term performance of the product.

Packing: 25KG, plastic drum /200KG, iron drum

Storage: Store in unopened original packaging for use within 12 months
